

Research progress reporting for Master's and Doctoral thesis students at McGill is mandatory. This report must be completed in full at least annually. This report may also be supplemented with unit-specific details or documents.

In cases where the student has missed an established progress report deadline and has not responded to the Unit within 4 weeks after being contacted by the Unit, the report may be completed in the student's absence, and progress may be judged unsatisfactory.

The student, supervisor(s), and academic unit must retain copies of this form. It must also be made available to members of the advisory committee and university administrators authorized to view student records upon request.

Please TYPE your answers to the following questions into this form fillable document. Comments are encouraged.

If a certain question does not apply to you, please indicate N/A. Thank you!

Note: If there is some information you would like to keep confidential, please inform Giovanna and/or Prof Knauper.

EVALUATION of progress toward objectives (to be completed by supervisor)					
	Research plan	Research skills	Requisite knowledge*	Research accomplishments	Overall
Satisfactory	☐	☐	☐	☐	☐
Unsatisfactory	☐	☐	☐	☐	☐ †
Not applicable	☐	☐	☐	☐	

*Requisite knowledge is often developed through coursework, which may be commented on in the box below. However, unsatisfactory progress in coursework alone cannot lead to an unsatisfactory progress report because a separate Failure Policy governs coursework. Please see the Failure Policy in Graduate Studies on the University Regulations and Resources website, starting at www.mcgill.ca/study.

†A first overall unsatisfactory report must lead to a follow-up progress tracking meeting, not sooner than 4 months after the first report and not later than 6 months after the first report. DEADLINE FOR FOLLOW-UP REPORT: _____.

Failure to meet overall objectives on two reports (not necessarily successive) constitutes unsatisfactory progress towards the degree and, if recommended by the academic unit, the student will be withdrawn from the University.

SUPERVISOR'S_EXPLANATION of the evaluation, and comments on related areas, such as coursework, lab work, etc., as appropriate.

[Regulation on Conflict of Interest](#) - **If anyone checks YES, the form must be submitted to the Dean of GPS with an explanation. If there is any doubt, contact the appropriate GPS Associate Dean.

"Conflicts of interest may take various forms and may arise in various contexts. A potential conflict of interest will exist whenever a member of the University community is in a position to influence the conduct of research, academic, human resource, business, financial, governance or other matters in ways that could lead to personal gain for the member or a related party, or give improper advantage to others, to the detriment of the University or other members of the University community."

"The Regulation recognizes that the existence of a potential conflict situation does not necessarily connote misconduct or preclude the involvement of a member in the situation in which the conflict has arisen – provided the conflict is recognized, disclosed, assessed and addressed. However, it must be recognized that not all conflicts of interest, even if disclosed in a timely manner, will be permitted."
